Original Design

Background = 4.25 X 5.5

Pattern (so you can use your pretty paper)

Tutorial Video

Directions:

1. Using the Zoe Paper pack, select your papers. This card used the glacier houndstooth paper and a glacier card base. Card base is just 8.5 X 5.5 scored in the middle (4.25)
2. Cut your white piece (2.25 X 5.5) and use Random Stamping to create a pattern using colors that coordinate with the paper you selected. This card used the So Sweet Stamp of the month as well as glacier, thistle, and sage inks.
TIP: When Random stamping, try to stamp the images in a triangle and be sure to rotate your stamps and stamp images partly off the paper. There is a video for this card that may help with Random Stamping
3. To stamp the leaves, you will need to use masking. Stamp the large flower on a piece of scrap cardstock and cut it out. Line the cut-out flower over the stamped flower to mask it. Now you can stamp the leaves where you want, and the part that would go over the flower will be stamped on to the mask. The result will be a flower that looks like it's in front of the leaves.
4. The centers of the flowers were stamped by using a sponge dauber in a different color (I used Thistle) then stamping the center with the inked dauber – it happens to be the perfect size for the centers of the large flowers.
5. If you are adding a ribbon or twine (I used Thistle striped ribbon) attach it to the patterned paper by gluing the ends to the back of the paper before gluing it down.
6. Attach your pattern paper and your random stamped white paper.
7. Don't forget the sentiment (I used the So Sweet stamp and popped it up with a piece of 3D Foam Tape).
